

Dear Friend,

The PRIDEnet team wants to thank you for all your support this past year. Because of your dedication to PRIDEnet and LGBTQ+ health research, The PRIDE Study published 11 new research studies (pridestudy.org/research) in 2022 and our *All of Us* Research LGBTQ+ website (joinallofus.org/lgbtq) has received over 18,000 website visits.

As our team and community grow, we hope you will continue supporting our journey for health equity. Can we count on you to recommend, share, and encourage at least one person to follow our work, participate in our events and/or participate in [The PRIDE Study](#) and/or [All of Us LGBTQ+](#) in 2023? We hope so!

Here's to an excellent 2022 and a fantastic 2023!

Together In Pride,

Ana Rescate

Ana Rescate, MBA

Communications Specialist, PRIDEnet

Join the conversation about raising children!

Very little is understood about the ways that LGBTQIA+ people build their families and become parents, and the health outcomes of LGBTQIA+ parents and their children. In addition, there are likely differences in approaches within the LGBTQIA+ community among people of different sexual orientations, gender identities, sexes assigned at birth, body parts, races/ethnicities, and financial or social situations. We'd like to change that but we need your help!

January Community Listening Sessions: Transfeminine people of all sexual orientations
Who are already parents: Now – January 22, 2023
Who are not yet parents: January 25 - 28, 2023

February Community Listening Sessions: Nonbinary and gender expansive people assigned male at birth of all sexual orientations
Who are already parents: February 1 - 4, 2023
Who are not yet parents: February 8 - 11, 2023

JOIN US

You have the power to drive health research. Without you, it won't be *All of Us*.

Thursday February 2nd, 12pm (PST)

REGISTER: joinallofuslgbtq.eventbrite.com

Precision Medicine Initiative, PMI, All of Us, the All of Us logo and The Future of Health Begins With You are service marks of the U.S. Department of Health and Human Services.

Join [All of Us LGBTQ+](#)

All of Us LGBTQ+ is part of a unique mix of organizations, researchers, health care professionals, technology experts, community partners, and participants. We often share stories from other community partners and/or the *All of Us* Research Program's [main page](#).

In The News!

"There's a gap in medical research that only you can fill" is the bold-faced first line of All of Us's website. "You're one of a kind, and that's kind of our thing."

A program of the National Institutes of Health, *All of Us* aims to invite one million or more people across the United States to build history's most diverse health database — especially an oft-overlooked population. PRIDEnet, based out of Stanford University, is a National Community Engagement Partner with *All of Us*, with a focus on engaging the LGBTQ+ community.

"All LGBTQ+ Americans deserve to be seen, heard, and understood — especially when it comes to medical research," says Ana Rescate, MBA, PRIDEnet Communications Specialist. Inclusion is a major goal of PRIDEnet's work with *All of Us*. Rescate adds, "Understanding how lifestyle, genetics, and environment affect the health of the queer community is what inspires the research."

Transgender patients' biggest barrier to care may be the care experience itself. In the U.S. Transgender Survey, conducted in 2015, one-third of respondents said they had at least one negative experience with a clinician in the last year related to being transgender, including verbal harassment or refusal of care. Nearly a quarter of respondents reported that they avoided needed care out of fear of being mistreated.

These types of experiences lead patients to delayed care, causing them to present with late-stage or uncontrolled conditions, from diabetes to advanced cancer, said Mitchell R. Lunn, MD, MAS, FACP, an assistant professor of medicine and of epidemiology and population health at Stanford University School of Medicine in California and Co-Director of The PRIDE Study and PRIDEnet.

Hear from Researchers!

The *All of Us* Researchers Convention provides an opportunity for a broad spectrum of researchers using the *All of Us* Research Program data and tools offered through that Research Hub to showcase their work with their colleagues, peers, and others who share their passion for advancing precision medicine. From Wednesday, March 29 through Friday, March 31, 2023, the free, virtual convention will highlight researchers at various educational and professional career stages.
